

# **RADIUM PLASMA FIRE**

The Superior Radium Plasma Gas Fire is a beautiful gas fire for modern interiors and especially for those who want a radical and eye catching focal point for any room. So called because it resembles a plasma television, the Radium Plasma Gas Fire provides a highly efficient and economical heating device; for the style conscious it is a natural choice.

## **Dynamic Aesthetic for your favourite room**

The Radium Plasma Gas Fire is a serious gas fire for serious design enthusiasts. Give your new home a unique style. The metallic frame floats away from the wall and curves subtly into the room. Made from anodized aluminum, the mounting is the height of understated cool. Sitting centrally on the mount is the fire itself, framed to perfection by the black glossy reflective deep boarder. Adding another layer to the unit, suddenly your room will be transformed by the added definition this gas fire gives you. Behind the thermal glass lies a simple fire that offers a quite mesmerizing appeal which soothes your eyes as it warms your body.

The fire needs no hearth, no recess and no expensive and messy construction to fit it in your home. Once you have chosen a suitably strong wall, the fire is mounted on an included fixing template which ensures your fire is secure and ready to perform.

## **The Radium in Action**

Once up and running, the Radium gas fire is a highly efficient heating device which projects 2.6kw of heat into your room. Using natural gas, it provides this heat whilst using 100% of the gas so you get the maximum bang for your buck. The Radium flueless gas fire has a manual rotary control concealed behind the glass. Operated manually, the fire is incredibly easy to operate and adjust to your ideal settings. The flames lick out behind the thermal screen for a highly calming and soothing comfort.

The Radium gas fire therefore is incredibly desirable due to its looks, simple operation and powerful performance.
